Daimoku chart maker type I ver1.01 use

1.First, please input the characters that you want to divide.

Push "Block Character" button above.

The character up to two lines can be input. Please erase the character of the second line when you want to make it only to one line. Next, you choose font, and thin or bold style of character. In addition, The direction of the character must be chosen. In that case, because the direction of the form and the printer settings are changed in the automatic operation, you don't have to change the printer settings.

2.Layout of block character

By dragging with the mouse, you can control the expansion and reduction, spacing of the character. Only by the mouse, they can be changed. When the mouse is closed to the corner of the object, the mouse pointer's shape changes into "an expansion and reduction mode".

3.The number of the blocks' setting

Please push "Block" button above.

First of all, the total number of Daimoku must be set. The default setting is one million times. Next, please input the time of one block. Moreover, the shape of the block(square or circle) can be chosen. In a detail setting, you can choose the interval of blocks and the time needed to chant 1000 times.

Attention 1:It becomes impossible to change the size and the character spacing of the object when the number of the blocks are set once. In this case, it is possible to change only the position of the object. Please retry from "Block Character" setting when you want to change the font size etc. again. By double-clicking of the object, it becomes possible to change, too.

Attention 2: Neither "detail setting" nor the "Block" setting are preserved. Every time, set it please.

4.Print

It is possible to print by pushing "Print" button. It is possible to print on various sizes' form, even though is optimized to the A4 form.

5.Preservation

Daimoku charts can be preserved. They can be processed by the other applications if they are preserved in the image format though are done in the original format.

6.Others

As document, Daimoku chart is still very few existence now. Will you enable other people to use the masterpiece that you made? Please send them with mail. I will open it to the public on the homepage.
